

Melt & Pour Crystal Organic

Our vegetable based, melt and pour soap base is Certified by both the Soil Association and Cosmos (UK). For the manufacture of natural Soap bars.

Crystal OMP has fantastic foaming performance, translucent, perfect for adding botanicals or additives. The neutral odour also provides excellent fragrance lift in finished soap bars. Crystal soap bases are ideal for manufacturers, brands and home hobbyists. Simply Melt, Mix, Pour, Create.

- Certified by the Soil Association & Cosmos (UK)
- Made using 72.7% Organic Ingredients
- Allows simple melt and pour production of a natural translucent bar
- Contains no MPG
- Natural light brown colour from use of the organic oils and organic sugar
- Good moisturising from a high glycerine content and aloe vera which provides a pleasant skin feel
- Fantastic foaming performance
- Natural formulation
- Paraben free
- Sulfate free
- Made in the UK by Stephenson Personal Care

To create your very own set of handmade glycerine soap bars, you will need:

- Crystal OMP slice into meltable chunks
- Fragrance if you wish
- Dried botanicals if you wish
- A soap mould and slicer, Microwave / Double boiler

Open/Cut - simply open the packaging, safely cut the Crystal soap base into smaller cubes, doing this will make the soap easier to handle and melt.

Melt - gradually heat the soap base ensuring that the soap melts evenly and does not boil and burn. If you are melting in a microwave please be careful and keep an eye on the soap as it can bubble over the container.

Mix - you can use Essential Oils, Fragrances, Colours, Botanicals and Additives. Simply add to the melted soap base, mix gently ensuring that any fragrance you have added is evenly distributed throughout the soap base.

Pour - working quickly, simply pour your soap base into your soap mould. At this point you can add dried botanicals to the surface of the soap, by gently pressing them into the top of the soap if you wish.

Create - once your soaps have set and fully hardened simply remove from the moulds. We recommend always wrapping your soap bars immediately after releasing from the moulds to protect and preserve the soap.

Melt and Pour Soap bases usually require less fragrance and essential oils than your Cold process soap does. However, as a general guide the following is useful for safety.

When using Melt & Pour Soap Base we recommend that you use 1 – 1.5% of fragrance/essential oils for the weight of the soap. We have found that this amount gives the perfect fragrance balance. Maximum scent load for M&P soap is 2.5% for safety.

Note: When using very strong essential oils for example Lemon Eucalyptus, Lemon Myrtle and Peppermint etc use the maximum of 1.5%.

To scent 500g of Soap Base at 1% use 5mls of Fragrance/Essential Oil.

If you are measuring in drops, there are approximately 20 drops per ml.

For example: A 100g bar of soap at 1.0% you would use 20 drops or 1ml.

You do not have to scent as high as 2.5% (we only use 1% in our Melt & Pour Soaps). We recommend that you always do your own testing and make a 100g bar using the minimum amount of scent. Allow to set, and judge the results for yourself you can then adjust the fragrance if desired within the maximum guidelines.
